EXPERIENCE

TravelBrands

Dec.2023 – June.2025

Application Developer

Toronto, ON

- Decomposed monolithic components into scalable microservices, resulting in a 25% increase in API throughput and directly contributing to a \$400k+ annual revenue uplift through improved payment processing reliability
- Developed and Refactored high-performance dynamic applications handling peak seasonal traffic spikes, ensuring 99.9% up-time, meeting during critical booking periods.

Loblaw Digital

May.2022 - Feb.2023

Site Reliability Engineer

Toronto, ON

- Orchestrated deep-dive audits of Google Cloud Platform resources to right-size over-provisioned instances, driving a \$50,000 annual cost reduction (approx 25% savings) while maintaining 100% service availability.
- Designed and deployed an automated certificate management solution using GoLang, eliminating manual expiration errors and ensuring zero-security incidents due to expired certs.

Loblaw Companies Limited

Apr.2021 - Apr.2022

Technology Innovation Intern

Brampton, ON

- Developed and deployed multiple proofs of concepts to live stores using JavaScript, Node JS, MongoDB, React, Vue, and AWS.
- Hosted and presented multiple Lunch and Learns that were open to colleagues company-wide and presented topics on Computer Vision and Quantum Computing to over 100+ live attendees

IBM

May.2019 - Apr.2020

Front End Developer Intern

Markham, ON

- Designed and Implemented a Slack bot with access restrictions in Node.js that automated the deployment of Jenkins scripts
- Implemented filters using React.js to dynamically find testing reports depending on the development cycle stage.

PROJECTS

Chord Bot

- An IRC bot that recommends video game levels for the rhythm game, Osu!
- Catered towards beginners to professionals using a ranking system. It implements throttling, a custom filtering system, and spam protection. It also has a front end system for development testing purposes. Viewable on [Github](#).

Java Fighters

- A video game engine for a 2D-Fighting Game created in Java alongside a collaborator that features me as a character.
- It inspired me to pursue Computer Science. Viewable on [Github](#). A demo can be showcased during a conversation.

EDUCATION

Toronto Metropolitan University

Sept. 2015 – Dec 2022

B.Sc. Computer Science

Toronto, ON
